# Self-adhesive book protection films

ASLAN self-adhesive book protection films conserve books against dirt and wear, extend their durability and enable easy cleaning and disinfection. A special, pH-neutral adhesive avoids decomposition of the book cover.

## Glossy book protection film for smooth surfaces

With reduced initial adhesion for smooth surfaces

**ASLAN BE 230**

## Matt book protection film for smooth surfaces

With reduced initial adhesion for smooth surfaces

**ASLAN BE 231**

## Glossy book protection film for structured surfaces

With high initial adhesion for structured surfaces

**ASLAN BE 233**

## Matt book protection film for structured surfaces

With high initial adhesion for structured surfaces

**ASLAN BE 234**

## Clear rigid PVC-film

This self-adhesive, rigid PVC-film has a thickness of 200 µm. Due to its high stability and transparency it is ideally suitable for the protection and backing of paperbacks, covers, charts, maps and sheet music, ensuring a long durability.

**ASLAN H 200**

PVC-  
free

## Self-adhesive **PVC-free** book protection films

These ecologically friendly, PVC-free self-adhesive films guarantee a perfect protection for books. They offer a long-lasting protection against dirt and other external influences. A special, pH-neutral adhesive avoids decomposition of the book cover.

### **PVC-free premium book protection film with scratch resistant lacquering**

Matt, permanent adhesive for structured and smooth surfaces

**ASLAN BE 2000 matt**

Glossy, permanent adhesive for structured and smooth surfaces

**ASLAN BE 2000 glossy**

### **PVC-free book protection film**

Glossy, PVC-free book protection film, semi-permanent adhesive for structured and smooth surfaces

**ASLAN SL 200**

## Protection film for geographical maps

### **Highly flexible protection films for maps**

Especially soft and writeable laminating film with reduced initial adhesion for protecting maps, plans, drawings, etc.

**ASLAN mipofolie P**

# Self-adhesive repair materials

In case of damaged spines or torn pages, ASLAN offers the right solutions with self-adhesive repair materials for books.

## Spine cotton fabric for an easy repair of books

Flexible, white spine fabric for backing and repairing book spines and covers, acid-free and tearproof.

**ASLAN SK-F**

## Eco-friendly PP-film for long-lasting repair works

Ecologically friendly, clear, glossy PP-film for long-lasting repair works, with pH-neutral adhesive, ensures a good readability of labels and barcodes.

**ASLAN R 209**

## Transparent, self-adhesive repair paper

Highly transparent, very thin repair paper for fixing ripped or torn-out pages, sheet music, drawings etc. Allows nearly invisible repair of torn pages, no copy shadows. PH-neutral adhesive to preserve cellulose fibers, resistant to aging and yellowing.

**ASLAN P 025**

## White, self-adhesive repair paper

White repair paper for backing and repairing inner book spines and fixing ripped or torn-out pages. PH-neutral adhesive to preserve cellulose fibers, resistant to aging and yellowing. The repair paper is flexible and is perfect to repair inner book spines.

**ASLAN P 045**

## Double-sided self-adhesive films

With double-sided self-adhesive films of ASLAN, maps, prints, posters and other non-adhesive materials can quickly and easily be turned into high quality self-adhesive products. Our double-sided self-adhesive films are equipped with a pH-neutral adhesive and are suitable for various surfaces. They replace liquid or spray adhesives and ensure a clean application. For easy manual applications our double-sided self-adhesive films are equipped with release liners on both sides. One side has a grid pattern that helps cutting the film into shape.

### **Double-sided self-adhesive film with excellent flatness, permanent | permanent**

Ideal for creating self-adhesive sheets. High stability, both sides with permanent adhesive and reduced initial adhesion

**Premium MountFilm ASLAN DK 1**

### **Double-sided self-adhesive film, permanent | permanent**

For applications on smooth and rough surfaces. Both sides are equipped with a permanent adhesive. One side offers a reduced initial adhesion, the other side has an extra strong adhesive.

**MountFilm HighTack ASLAN DK 3**

### **Double-sided self-adhesive film, permanent | removable**

For applications on all smooth surfaces. One side is equipped with a removable adhesive. The other side has a permanent adhesive with reduced initial adhesion

**MountFilm Remove ASLAN DK 4**

## Self-adhesive memoboard films

ASLAN offers a variety of creative self-adhesive solutions for organising work and leisure time.

With our memoboard films you can turn every smooth surface into a blackboard or whiteboard or make it suitable for applying magnets. Due to a large range of product characteristics and the possibility of combining these self-adhesive films, there are no limits to your creativity.

### Blackboard films

Blackboard film for chalk, green

**Greenboard** ASLAN C 60
