MORE POSSIBILITIES ON THE SURFACE

ASLAN Top Coats

DESIGN FREEDOM FOR FUNCTIONAL SPECIALITY FILMS

ADVANTAGES:

- Functional surfaces:
  specific properties through different top coats
- Greater design freedom:
  new possibilities for appearance and feel
- High resistance:
  tailor surfaces to specific levels of wear
- Optimised printability:
  top coats for different printing requirements
- Flexible product system:
  combine base film, adhesive and top coat
- Individual solutions:
  custom combinations beyond the standard range

With a new Top Coat technology, ASLAN is expanding the possibilities for functional speciality films. The surface coatings make it possible to tailor properties such as appearance, scratch resistance and printability to the specific application.

OPTICS	PROTECTION	PRINT

Three top coat variants – matt scratch-resistant, glossy scratch-resistant and printable – form the basis for different product solutions. At the same time, the technology opens up new possibilities for customised product development: base film, adhesive and top coat can be combined to suit specific requirements.

This creates a flexible modular system for individual requirements – and greater scope for applications that go beyond the standard range.

THE MODULAR SYSTEM – THREE COMPONENTS. ONE SYSTEM.

Choose from our portfolio of base films, adhesives and top coats. Combine the components to suit your application – this creates your customised, self-adhesive film solution.
