book protection ASLAN BE 233/BE 234

Book protection films for textured surfaces

This self-adhesive glossy book covering films for textured surfaces provides optimum protection from soiling. They prevents premature wear, extending the life of books. A special, pH-neutral adhesive avoids degradation of the book cover.

Beyond books, the film can also be used for long-term protection of drawings, plans and sheet music, and covered items can be easily cleaned and disinfected.

Despite strong initial adhesion, the protective film can be easily corrected during application.

| Construction | | | | | | |
|--------------------------------|---|---|--|--|--|--|
| Face film: | PVC | | | | | |
| Thickness: | ~ 80 µm | | | | | |
| Adhesive: | pressure sensitive polyacrylate | square quantity : ~ 25 μm | | | | |
| Release liner: | siliconised paper | square weight: ~ 63 g/m² | | | | |
| Characteristics | | | | | | |
| Adhesive strength (ASTM D903): | immediately: after 1 week: | ~ 5,2±0,8 N/25mm | | | | |
| | | The final adhesive strength is, depending on the surface, reached within 24-48 hours. | | | | |
| Dimensional stability: | applied onto aluminium after 48 hours stored at 70 °C (158 °F) (25 x 25 cm) | max0,75% | | | | |
| Combustibility: | Stuck on aluminium, the film is self-extinguishing. | | | | | |
| Temperature: | application temperature: service temperature range: | min 15 °C (59 °F) -30 °C (-22 °F) up to +80 °C (176 °F) | | | | |
| Cold resistance: | approx5°C | | | | | |

Application:

Storage:

The film is to be applied dry.

Before application the films can be stored up to 2 years from date of production. The film must be stored at room temperature (15-25 °C / 59-77 °F) and at a relative air humidity of 50-60%. To avoid pressure points appearing on the roll surface, we recommend the rolls be stored either standing vertically or in a purposely designed `hanging' racks.
